Work Experience

Trust - 2018 – 2019

Application Developer, Baghdad.

Developing e-commerce and library applications

SRIT - 2019 – 2020

Flutter Developer, Baghdad.

Developing school management application

Programming Skills

Flutter: 3 years of experience

Kotlin: using jetpack compose

Swift: using swiftui

Basics of Html, Css, JS, Ionic, ElectronJs.

Work easily with APIs either Restful or GraphQL.

Work Professionally with Firebase services.

Flutter Framework

State management: I can use or easily adapt any available state management approach such as Getx, Provider, Bloc and Riverpod.

Design Pattern: Singleton with dependency injection.

UI/UX Design: Using Figma and Adobe xd.

Widgets Design: designing with available widgets or drawing them using canvas.

Implement Designs: easily implement any required design, I have already worked with designers who provides me with design using Adobe Xd or Figma. Some of designs I implemented before: [here](#) and [here](#).

Uploading and managing applications: I uploaded and updated +30 copies of application on both App Store and Play Store.

Teamwork: I can work with team under senior programmer supervision and individually.

File Architecture: Feature based, Page based or custom.
